

Emergency Contraception

Answer these questions about emergency contraception (EC)

1.	What types of accidents or other situations can lead people to seek emergency contraception (EC)? List them.
2.	How long after unprotected sexual intercourse can people access EC?
3.	List three types of emergency contraception?
4.	Is EC safe? Is EC effective? Are there side-effects? (Provide different ways of describing the effectiveness of EC from your assigned readings.)
5.	What is the difference between emergency contraception and RU 486 (abortion pill)?
6.	Does emergency contraception protect against sexually transmitted infections?
7.	How available is emergency contraception in Canada? (Are all health care providers ready and willing to prescribe EC to teens?)
8.	What should you do if you think you or your partner are/is already pregnant? Is there a reliable way to determine if you are pregnant?
